LEAD THE CHANGE

THE WORLD IS CHANGING

Shouldn't the world of education keep pace?

The 21st century is witnessing accelerated change and groundbreaking innovations.

In the last few decades, there has been a quantum leap in technology and the way we live, learn and work.

However, our educational system and institutions have been slow in adapting to this change.

At Delhi International School, we have been ahead of the curve in bringing the change, and redefining how we raise the next generation.

In the pages to follow, allow us to give you a glimpse of how our school, like our students, is ahead of the rest.

LEADING THE CHANGE BY

turning gardens, museums and factories into classrooms.

At Delhi International School, we follow the experiential learning methodology. As part of this, we regularly organize visits to historical buildings, zoological and botanical gardens, museums, art galleries, industries and recreational parks.

Our students are also encouraged to take part in community service programmes like visits to orphanages, SOS villages and old-age homes. They are also involved in development projects initiated by Eco-Libris, the school's environment conservative drive.

LEADING THE CHANGE BY

giving sports as much importance as science, history and mathematics.

At Delhi International School, we have incorporated physical education into the curriculum. We realise sports can teach skills like dedication, discipline, responsibility, self confidence, planning, leadership skills and co-ordination.

This is why participation is compulsory in sports and games. The campus has facilities for basketball, throw ball, table tennis, roller skating, volleyball, kho-kho, cricket, football, taekwondo and more. Many of our students are selected to play for the state and national teams.

LEADING THE CHANGE BY

creating home away from home.

We involve parents in almost every school activity. However, we do not let anyone, including parents, into the school premises without prior permission.

This is because at Delhi International School, we give utmost priority to the safety of our students. The entire campus, including all classrooms, is under CCTV Surveillance. We have also employed the services of a highly professional security team who handle the security needs of the school.

LEADING THE CHANGE BY

focussing on extracurricular activities for personality development.

At Delhi International School, we focus on the overall development of students. For this, we realize, classroom education alone is not enough.

For the multidimensional personality development, we expose students to various co-curricular & extracurricular activities like music & dance, art & craft, calligraphy, dramatics, martial arts, table tennis, chess, carrom, etc. Every student is encouraged to participate in one or more of these activities to develop their self-confidence and tap their talents and skills.

LEADING THE CHANGE BY

developing leadership skills through leadership activities.

At Delhi International School, we work towards inculcating leadership skills in our students.

Our student body representatives, like the Head Boy and the Head Girl, are elected by the students. We also have houses, each of which is headed by a House Captain and a Vice House Captain. The Student Council also has a Sports Captain and a Cultural Secretary. Further, we have clubs that are devoted to arts, sports and co-curricular activities.
