## Computer Activity (III-V)

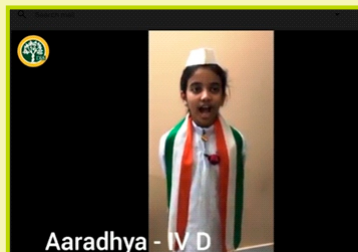

Computer is about how computers compute. It is not about learning how to use the computer, it is much more than computer programming. Computer studies is the study of ways of representing objects and processes. It involves defining problems; analyzing problems; designing solutions; and developing, testing, and maintaining programs. Keeping this in view, we planned different activities in classes 3, 4 and 5; wherein class 3 was supposed to make a birthday card, class 4 was asked to make a PPT on Diwali celebration with precautionary measures and similarly class 5 was asked to make a resume.

Students really enjoyed the activity and did it with great enthusiasm.

## Online Assembly on Diwali and Children's Day Celebration

Pankhuri - IV B

Aaradhya - IV D

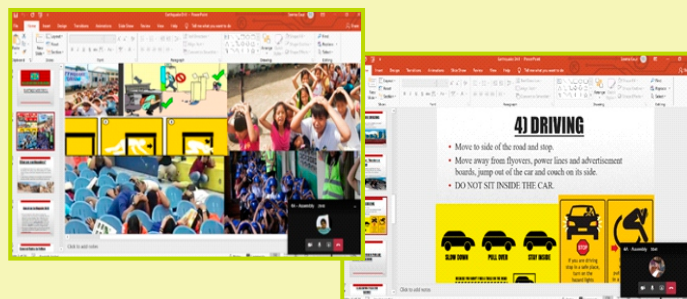

### LET'S CELEBRATE AN ECO-FRIENDLY DIWALI !!

The festival of lights came alive virtually at Delhi International School when all the students and teachers celebrated it with much pomp & show. The students of Devdaar House presented a beautiful song and dance performance. They also made beautiful rangoli. All the performances by junior and senior students were quite mesmerizing. All the staff members and students took a pledge of not burning crackers for the happy, healthy and prosperous life of people in the society.

You cannot teach science, you can only help to discover it around us and to nurture those scientific ideas of our little ones. Keeping this in mind various activities such as poster making and understanding through experimentation were conducted in class III to V. In order to spread awareness about global warming and depletion of natural resources i.e. the need of the hour, students made informative posters on global warming and sources of water. Experimentation being the inseparable part of science, students also learned to identify types of objects (Transparent, Translucent and Opaque) by observing passage of light through them.

## Earthquake Mock Drill

Life is apprehensive and the one who stands ready to face any situation emerges as the winner. We, at DIS, work towards shaping our students for various challenges. In accordance with the same ideology, a virtual Earthquake Drill was conducted in which the students were told about the possible plan of action and the do's and don'ts.

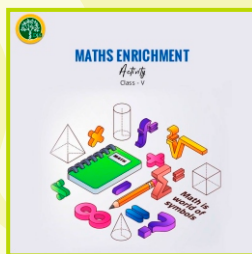

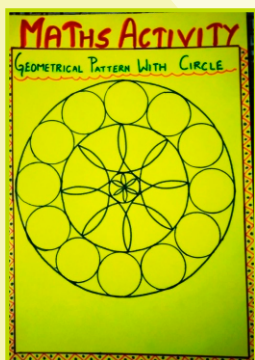

## Earth Quake Drill

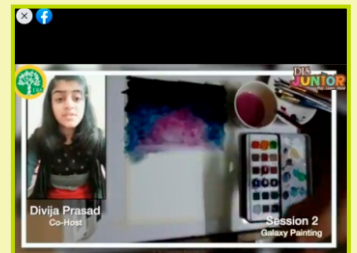

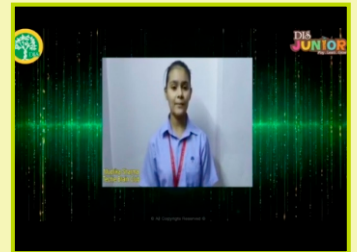

Earthquake drills and exercises are an extremely important part of preparedness plan because they teach students, staff and parent how to respond to the complications of an actual earthquake and help us evaluate how well all parts of the emergency plan work together. A virtual earthquake drill was observed on 25th November 2020 to prepare the students for such a disaster.

## Subject Enrichment Activity

Students of all ages love to play games that are fun and motivating. Engaging them in different activities of different subjects encourage students to explore. Like in mathematics they can understand number combinations, place value, patterns, and other important mathematical concepts.

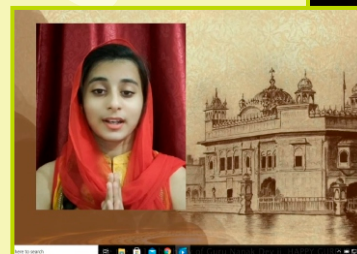

Keeping this in mind, we planned an activity of 'Building House of the table of 9'. Students built their own houses using papers, crayons and scissors.

Delhi International School held its Club Culmination Day on 23rd November, 2020 to mark the end of the club activities for the academic year 2020-21. The clubs introduced this year were The Artists' Hub, Zero to Infinity Club, Jhankaar Club, Fit is Hit Club and Techie Brains.

Indeed, the winner is one and The Artists' Hub won the title of BEST CLUB. During the show, the student representatives displayed the skills acquired round the year in their respective clubs.

## Special Assembly

On account of Diwali and children's day, students of Devdaar house presented an assembly on 13th November focusing on every aspect of this day and spread the message of brotherhood and love. They showed importance of knowledge in our society. They were showing different art techniques to decorate houses. On 27th November, Delhi international school organized special assembly on the occasion of Guru Nanak Jayanti. We celebrated 551th birthday of Guru Nanak Ji.
